Maine Revised Statutes 1964, Title 26, §§ 42, 43, 46: "The Bureau shall collect, assort and arrange statistical details relating to . . . industrial pursuits in the State. He (the Director) may . . . cause to be printed and distributed bulletins . . . that shall be of public interest and benefit to the State."

C O V E R A G E

This survey, insofar as possible, is of universal coverage for Maine manufacturing establishments ranging from the single proprietorships to the largest corporations. Reports covering 2,289 establishments were received since the original mailing in April of 1983. Of these, 189 either did not operate or went out of business in 1982. Final tabulations, according to the major breakdown, will appear as usual in the next Census. These tabulations will include the late reports which are not included in this Census.

Taking into consideration the nature of the Maine economy and the extent of coverage in this survey, the data contained in this, The Census of Maine Manufactures 1982, represent a comprehensive and valid statistical analysis of the Maine manufacturing economy.

CENSUS OF MAINE MANUFACTURES

1982

The Research and Statistics Division of the Bureau of Labor Standards gratefully appreciates the contributions made by others towards this publication.

Thanks are due:

To Maine's manufacturing businesses for their cooperation in the collection of Census data, which makes this publication possible;

To the staff of the Division of Economic Analysis and Research for their cooperation in providing the employment and wage data herein.

Thanks also go to Terry Hathaway of our staff, who typed the entire publication.

The contents of this publication are considered to be in the public domain and may be reproduced without permission. We do request, though, that appropriate citation be made.

Maine Production Value Nears \$8 Billion Mark

Maine's gross value of product reached \$7,948.9 million in 1982, a gain of 1.2% above 1981's \$7,851.3 million. The increase did not keep pace with the Producer Price Index, which rose 2.4% for the period. Therefore, in terms of constant dollars (using the Producer Price Index as a deflator), Maine's production actually decreased 1.1%. (See Appendix F.)

Continuing the past pattern, the Durable Goods group increased by 2.8% while the Nondurable Goods group increased by only .6%.

The Paper Industry continued its domination of Maine manufacturing, with a 34.1% share of the manufacturing value or \$2,714.2 million of paper products. Leather was second, with 12.1% of the total or \$961.4 million in production.

Among industry groups, there were varying experiences in expansion and decline for 1982. The State's leading producer, the Paper group, declined by 1.4%, the first such decline since 1975. The Transportation Industries made a 24.8% leap over Lumber and Woods' decline of 7.9%, swapping those two around. Transportation's growth was the largest while the Miscellaneous Manufacturing had the worst decline at 20.9%. Other notable changes were in Leather, with a 15.5% increase and Textiles, with a 14.2% decrease.

Value of
Product
(millions of
dollars)

Figure 2. -- VALUE OF PRODUCT FOR PRINCIPAL MAINE MANUFACTURE GROUPS
1981 & 1982

Manufacturing Employment

Employment in Maine manufacturing declined by 4.4% to 108,330, but national manufacturing employment was down 6.6% during the same period. The Leather industry again led employment, with 20,637 workers or 19.1% of the manufacturing work force. On the other hand, this was a reduction of 2.6%.

The largest fall in employment occurred in the Textile group, which lost 1,449 workers -- 17.7% of their 1981 employment. Lumber and Wood lost 1,091 or 8.2%. The largest increase was in Transportation, which gained 1,030 workers or 11.8%. All other gains were under 100 employees.

Employment of women in manufacturing suffered a slight setback in 1982. Female employment decreased by 5.9%, while male employment dropped only 3.6%. The proportion of women in the manufacturing work force fell slightly from 34.1% to 33.5%.

Figure 3. -- EMPLOYMENT FOR PRINCIPAL MAINE MANUFACTURE GROUPS
1981 & 1982

Wages

Gross wages in Maine manufacturing increased \$75.5 million or 4.5% to \$1,769.5 million. Nationally, manufacturing gross wages decreased .7%. Paper Industry wages continued to provide a little more than one-quarter of all the manufacturing wages in the State, paying out \$455.2 million. Leather provided \$241.4 million or 13.6%; Transportation Equipment, \$210.0 million (11.9%); and Lumber and Wood, \$170.5 million (9.6%).

The average yearly wage in Maine went up \$1,388 or 9.3% in 1982 to \$16,334. The U.S. average manufacturing wage increased by 6.6%. By comparison, the Consumer Price Index rose 6% over 1982 based on the annual averages. (See Appendix F.) So, Maine manufacturing workers had a 3.1% increase in buying power. Among the 19 industry groups, there is a wide dispersion of average wages. The Apparel group was lowest, with \$10,934 or 66.9% of the overall average; the greatest was the Paper group, with \$25,348, which is 155.2% of the Maine manufacturing average for 1982.

The greatest change in average wages for the year was in the Furniture group, which increased 29.2% over 1981. This was due, not so much to wage increases, but to the fact that there were seven plant closings in 1982, all of which had had low average wages in 1981. Other big gains in average wages were in Transportation, up 13.5%; Stone, Clay, and Glass, up 12.4%; and Electric and Electronics, up 11.7%.

The other side of the picture, slowest gains, occurred mostly in Maine's relatively labor-intensive industries. Textiles were up only 4.4%; Lumber and Wood, up 4.7%; Leather, up 5.2%; Apparel, up 5.5%; Chemicals, up 5.5%.

Union Coverage

The number of unionized manufacturing workers in Maine declined from 36,290 in 1981 to 35,122 in 1982. This represents a decrease of 3.1%. The ratio of unionized manufacturing workers, however, remained quite stable -- 32.0% in 1981; 32.4% in 1982. About 37% of all unionized manufacturing workers in-state are in the Paper Industry, which also is the manufacturing industry with the highest reported proportion of unionization at 72.6%.

Text Table 1. -- Workers Covered by Union Contracts
in Principal Manufacturing Industries
Maine, 1982

<u>Major Group (SIC)</u>	<u>Total Employment</u>	<u>Workers Covered</u>	<u>Percent Workers Covered</u>
Paper (26)	17,957	13,036	72.6%
Transportation Equipment (37)	9,722	6,842	70.4
Textiles (22)	6,719	2,293	34.1
Lumber & Wood (24)	12,214	3,654	29.9
Food (20)	8,815	2,346	26.6
Leather (31)	20,637	1,124	5.4
Electric & Electronic Equipment (36)	7,450	67	.9

Capital Outlays

Capital outlays for 1982 were down 25.6% to \$463.0 million. Almost three-quarters of this decrease is attributable to the Paper Industry as large expansion projects started in 1980 and 1981 were completed by 1982. Investment in the Paper Industry went down from \$407.3 to \$288.5 million, a 29.2% drop.

Text Table 2. -- Capital Outlays, by Selected Industry
Maine, 1982

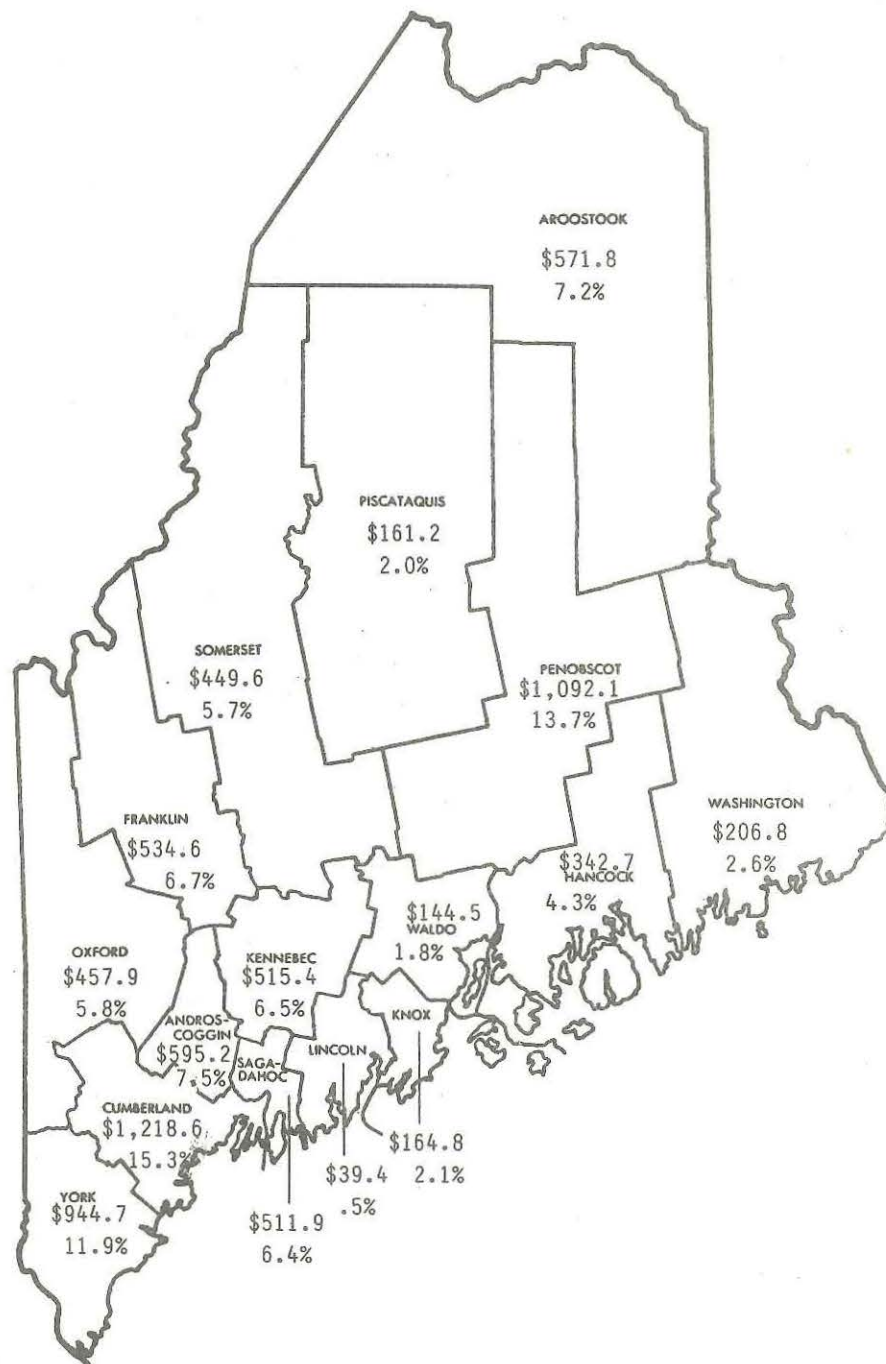

<u>Industry (SIC)</u>	\$ (000) <u>Actual 1981</u>	\$ (000) <u>Actual 1982</u>	Percent <u>Decrease</u>
Paper (26)	\$407,315	\$288,529	-29.2%
Electric & Electronics (36)	42,376	43,839	3.5
Lumber & Wood (24)	32,262	26,556	-17.7
Food (20)	21,104	19,678	-6.8
Transportation Equipment (37)	36,010	17,365	-51.8
Nonelectrical Machinery (35)	10,892	13,114	20.4
Leather (31)	12,953	12,619	-2.6
Textiles (22)	10,700	9,555	-10.7

Counties

The county leading manufacturing production of 1982 is, as has been in the past, Cumberland, with a \$1,218.6 million value of product. This represents 15.3% of the State's manufacturing value.

Penobscot County is second, with \$1,092.1 million or 13.7%; and York is third, with \$944.7 million or 11.9%.

Waldo	144.5	133.0	11.5	8.6
Lincoln	39.4	33.2	6.2	18.7

Economic Area

An 18.6% jump in value of product for Lincoln County, little change in Knox, and a brisk 8.6% increase in Waldo resulted in a moderate 5.7% growth in value of product for the Mid-Coast region. The I-95 Corridor and Western region showed modest gains of 2.4% and 3.1% respectively.

Aroostook County -- which constitutes the Northern Area -- had the greatest setback with a 9.3% decline. This was attributable to a hefty drop of 20.2% in the Lumber and Wood Products group, the major contributor to the area's value of product.

The Eastern counties fell 4.5% overall because of a substantial decline of 16.2% in Washington County matched by a modest increase of 4.4% in Hancock.

Text Table 4. -- Value of Product Change by Economic Area
Maine, 1981-1982

<u>Economic Area</u>	<u>1982 \$(000)</u>	<u>1981 \$(000)</u>	<u>Net Change +/- \$(000)</u>	<u>Percent Change</u>
I-95	\$4,875.3	\$4,761.2	\$+114.1	2.4%
Eastern	549.5	575.1	- 25.6	-4.5
Mid-Coast	348.6	329.8	+ 18.8	5.7
Northern	571.8	630.7	- 58.9	-9.3
Western	1,603.3	1,553.3	+ 50.0	3.1

Minor Civil Divisions

In 1981, Westbrook became the number one city or town for manufacturing in Maine, surpassing Jay. In 1982, however, Bath passed both to the number one position. The figures for all but Westbrook are confidential, but Bath's value of product increased by nearly one-quarter while Jay's decreased slightly from 1981 to 1982, explaining the change.

*Areas will not add to total due to presence of "no county" data.

APPENDIX A

Technical Notes and Definitions

VALUE OF PRODUCT is the net selling price of all goods manufactured or processed during the calendar year. If industrial operations were on a contractual basis, the total of amounts received for contract work or services performed has been included.

GROSS WAGES PAID shows total earnings during the calendar year of all employees before deductions, as reported to the Maine Employment Security Commission for Unemployment Insurance taxes. Before 1976, executives were excluded and wages were reported directly to the Bureau of Labor Standards. Because various fringe benefits, payroll taxes paid by employers, etc. are excluded, this data does not represent total labor costs on the part of the employer.

NUMBER OF WORKERS is that number reported in each month as of the payroll period including the 12th of the month, and averaged over the full twelve months.

AVERAGE GROSS WAGES is the figure obtained by dividing GROSS WAGES PAID by the TOTAL NUMBER OF WORKERS.

EXPENDITURES FOR PLANT MODERNIZATION AND EQUIPMENT (or Capital Expenditures) is the actual amount spent during the survey year and planned for the two succeeding years for three categories: New Structures and/or Additions or Alterations to Existing Structures, Purchase of Existing Structures, and Purchase of New or Used Machinery or Equipment. Land costs are excluded.

WORKERS COVERED BY UNION CONTRACT is the number of workers organized under a union contract and/or a collective bargaining agreement. It represents the number from one representative payroll period; the comparative figure for NUMBER OF WORKERS is an average for the year.

FOREIGN TRADE - EXPORTS is the estimated sales value of goods manufactured at an establishment that were shipped to foreign countries either directly or via out-of-state agents. IMPORTS is the estimated cost of materials imported from foreign countries for use in the manufacturing process at an establishment.

STANDARD INDUSTRIAL CLASSIFICATION (SIC) The Standard Industrial Classification system as compiled by the Executive Office of the President, Office of Management and Budget, was used to determine the industry title applicable to each establishment. Descriptions of major industry groups may be found in Appendix B. Each establishment has been classified according to its principal activity.

ESTABLISHMENT is defined as a single physical location where industrial operations are performed; it is, therefore, a place of business, rather than a legal entity or company which may have units in many locations. Where appropriate (e.g., logging operations) combined reports have been assigned to no specific civil division, merely to the county in which said principal location is found. A small number of multi-county operations report on a statewide basis.

CIVIL DIVISIONS are geographical units of government. Major civil divisions are counties; minor civil divisions are cities, towns, plantations, and townships.

ECONOMIC AREAS are defined in Appendix E.

SPECIAL STUDIES from Census data are available upon written request to the Director of the Bureau of Labor Standards. The Bureau reserves the right to reject any request or to charge the costs incurred.

APPENDIX B

Major Industry Descriptions, 1972 SIC

THE DIVISION AS A WHOLE

The manufacturing division includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power driven machines and materials handling equipment. Establishments engaged in assembling component parts of manufactured products are also considered manufacturing if the new product is neither a structure nor other fixed improvement. Also included is the blending of materials, such as lubricating oils, plastics, resins, or liquors.

The materials processed by manufacturing establishments include products of agriculture, forestry, fishing, mining, and quarrying as well as products of other manufacturing establishments. The new product of a manufacturing establishment may be "finished" in the sense that it is ready for utilization of consumption, or it may be "semi-finished" to become a raw material for an establishment engaged in further manufacturing. For example, the product of the copper smelter is the raw material used in electrolytic refineries; refined copper is the raw material used by certain electrical equipment manufacturers.

The materials used by manufacturing establishments may be purchased directly from producers, obtained through customary trade channels, or secured without recourse to the market by transferring the product from one establishment to another which is under the same ownership. Manufacturing production is usually carried on for the wholesale market, for interplant transfer, or to order for industrial users, rather than for direct sale to the domestic consumer.

20 **FOOD AND KINDRED PRODUCTS** This major group includes establishments manufacturing or processing foods and beverages for human consumption and certain related products, such as manufactured ice, chewing gum, vegetable and animal fats and oils, and prepared feeds for animals and fowls.

22 **TEXTILE MILL PRODUCTS** This major group includes establishments engaged in performing any of the following operations: (1) preparation of fiber and subsequent manufacturing of yarn, thread, braids, twine, and cordage; (2) manufacturing broad woven fabric, narrow woven fabric, knit fabric, and carpets and rugs from yarn; (3) dyeing and finishing fiber, yarn, fabric, and knit apparel; (4) coating, waterproofing, or otherwise treating fabric; (5) the integrated manufacture of knit apparel and other finished articles from yarn; and (6) the manufacture of felt goods, lace goods, nonwoven fabrics, and miscellaneous textiles.

This classification makes no distinction between the two types of organizations which operate in the textile industry: (1) the "integrated" mill which purchases materials, produces textiles, and related articles within the establishment, and sells the finished products; and (2) the "contract" or "commission" mill which processes materials

owned by others. Converters or other non-manufacturing industries; establishments which assign materials to contract mills for processing (other than knitting) are classified in nonmanufacturing industries; establishments which assign yarns to outside contractors or commission knitters for the production of knit products are also classified in this Group.

23 **APPAREL AND OTHER FINISHED PRODUCTS MADE FROM FABRICS AND SIMILAR MATERIALS** This major group, known as the cutting-up and needle trades, includes establishments producing clothing and fabricating products by cutting and sewing purchased woven or knit textile fabrics and related materials, such as leather, rubberized fabrics, plastics, and furs.

Included in the apparel industries are three types of establishments: (1) the "regular" or insider factories, (2) contract factories, and (3) apparel jobbers. The regular factories perform all of the usual manufacturing functions within their own plant; the contract factories manufacture apparel from materials owned by others; and apparel jobbers perform the entrepreneurial functions of a manufacturing company, such as buying raw materials, designing and preparing

23 (continued)

samples, arranging for the manufacture of the garments from their materials and selling of the finished apparel.

Custom tailors and dressmakers not operating on a factory basis are classified in Retail Trade; establishments which purchase and resell finished garments but do not perform the functions of the apparel jobbers are classified in Wholesale Trade.

24 LUMBER AND WOOD PRODUCTS, EXCEPT FURNITURE This major group includes logging camps engaged in cutting timber and pulpwood; merchant sawmills, lath mills, shingle mills, cooperage stock mills, planing mills, and plywood mills and veneer mills engaged in producing lumber and wood basic materials; and establishments engaged in manufacturing finished articles made entirely or mainly of wood or wood substitutes. Certain types of establishments producing wood products are classified elsewhere. For example, furniture and office and store fixtures are classified in Major Group 25; musical instruments, toys, and playground equipment, and caskets in Major Group 39. Woodworking in connection with construction, in the nature of reconditioning and repair, or performed to individual order, is classified in nonmanufacturing industries.

25 FURNITURE AND FIXTURES This major group includes establishments engaged in manufacturing household, office, public building, and restaurant furniture; and office and store fixtures. Establishments primarily engaged in the production of millwork and wood kitchen cabinets are classified in Major Group 24; cut stone and concrete furniture in Major Group 32; laboratory and hospital furniture in Major Group 38; beauty and barber shop furniture in Major Group 39; and woodworking to individual order or in the nature of reconditioning and repair in nonmanufacturing industries.

26 PAPER AND ALLIED PRODUCTS This major group includes the manufacture of pulps from wood and other cellulose fibers and from rags; the manufacture of paper and paperboard; and the manufacture of paper and paperboard into converted products, such as paper coated off the paper machine, paper bags, paper boxes, and envelopes. Certain types of converted paper products are classified elsewhere, such as abrasive paper in Major Group 32; carbon paper in Major Group 39; and photosensitized and blueprint paper in Major Group 38.

27 CHEMICALS AND ALLIED PRODUCTS This major group includes establishments engaged in printing by

one or more of the common processes, such as letterpress, lithography, gravure, or screen; and those establishments which perform services for the printing trade, such as book-binding, typesetting, engraving, photoengraving, and electrotyping. This major group also includes establishments engaged in publishing newspapers, books, and periodicals, regardless of whether or not they do their own printing. News syndicates are classified in Service Industries, and textile printing and finishing in Major Group 22.

28 CHEMICALS AND ALLIED PRODUCTS This major group includes establishments producing basic chemicals and establishments manufacturing products by predominantly chemical processes. Establishments classified in this major group manufacture three general classes of products: (1) basic chemicals, such as acids, alkalies, salts, and organic chemicals; (2) chemical products to be used in further manufacture, such as synthetic fibers, plastics materials, dry colors, and pigments; (3) finished chemical products to be used for ultimate consumption, such as drugs, cosmetics, and soaps; or to be used as materials or supplies in other industries, such as paints, fertilizers, and explosives. The mining of natural rock salt is classified in mining industries. Establishments primarily engaged in manufacturing nonferrous metals and high percentage ferroalloys are classified in Major Group 33; silicon carbide in Major Group 32; baking powder, other leavening compounds, and starches in Major Group 20; and artists' colors in Major Group 39. Establishments primarily engaged in packaging, repackaging, and bottling of purchased chemical products, but not engaged in manufacturing chemicals and allied products, are classified in trade industries.

29 PETROLEUM REFINING AND RELATED INDUSTRIES This major group includes establishments primarily engaged in petroleum refining, manufacturing paving and roofing materials, and compounding lubricating oils and greases from purchased materials. Establishments manufacturing and distributing gas to consumers are classified in public utilities industries, and those primarily engaged in producing coke and by-products in Major Group 33.

30 RUBBER AND MISCELLANEOUS PLASTICS PRODUCTS This major group includes establishments manufacturing from natural, synthetic, or

reclaimed rubber, gutta percha, balata, or gutta siak, rubber products such as tires, rubber footwear, mechanical rubber goods, heels and soles, flooring, and rubber sundries. This group also includes establishments primarily manufacturing tires, but establishments primarily recapping and retreading automobile tires are classified in Services. This group also includes establishments engaged in molding primary plastics for the trade, and manufacturing miscellaneous finished plastics products. The manufacture of elastic webbing is classified in Major Group 22; products made of elastic webbing and garments made from rubberized fabrics in Major Group 23; and synthetic rubber in Major Group 28.

31 LEATHER AND LEATHER PRODUCTS This major group includes establishments engaged in tanning, currying, and finishing hides and skins, and establishments manufacturing finished leather and artificial leather products and some similiar products made of other materials. Leather converters are also included.

32 STONE, CLAY, GLASS AND CONCRETE PRODUCTS This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining and quarrying activities are classified in Mining. When separate reports are not available, the mining and quarrying activities other than those of Minerals, ground or treated, are classified herein with the manufacturing operations.

If separate reports are not available for crushing, grinding, and other preparation activities of Minerals, ground or treated, these establishments are classified in Mining.

33 PRIMARY METAL INDUSTRIES This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke. Establishments primarily engaged in manufacturing metal forgings or stampings are classified in Major Group 34.

34 FABRICATED METAL PRODUCTS, EXCEPT MACHINERY AND TRANSPORTATION EQUIPMENT This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, hand tools, cutlery, general hardware, nonelectric heating apparatus, fabricated structural metal products, metal forgings, metal stampings, ordnance (except vehicles and guided missiles), and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups, such as machinery in Major Groups 35 and 36; transportation equipment, including tanks, in Major Group 37; professional scientific and controlling instruments, watches and clocks in Major Group 38; and jewelry and silverware in Major Group 39. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in Major Group 33.

35 MACHINERY, EXCEPT ELECTRICAL This major group includes establishments engaged in manufacturing machinery and equipment, other than electrical equipment (Major Group 36) and transportation equipment (Major Group 37). Machines powered by built-in or detachable motor ordinarily are included in this major group, with the exception of electrical household appliances (Major Group 36). Portable tools, both electric and pneumatic powered, are included in this major group, but hand tools are classified in Major Group 34.

36 ELECTRICAL AND ELECTRONIC MACHINERY, EQUIPMENT, AND SUPPLIES This major group includes establishments engaged in manufacturing machinery, apparatus, and supplies for the generation, storage, transmission, transformation, and utilization of electrical energy. The manufacture of household appliances is included in this group, but industrial machinery and equipment powered by built-in or detachable electric motors is classified in Major Group 35. Establishments primarily engaged in manufacturing instruments for indicating, measuring, and recording electrical quantities are classified in Major Group 38.

37 TRANSPORTATION EQUIPMENT This major group includes establishments engaged in manufacturing equipment for transportation of passengers and cargo by land, air, and water. Important

37 (continued)

products produced by establishments classified in this major group include motor vehicles, aircraft, guided missiles and space vehicles, ships, boats, railroad equipment, and miscellaneous transportation equipment such as motorcycles, bicycles, and snowmobiles. Establishments primarily engaged in manufacturing mobile homes are classified in Major Group 24.

38 MEASURING, ANALYZING, AND CONTROLLING INSTRUMENTS;

PHOTOGRAPHIC, MEDICAL, AND OPTICAL GOODS; WATCHES AND CLOCKS This major group includes establishments engaged in Manufacturing instruments (including professional and scientific) for measuring, testing, analyzing, and controlling, and their associated sensors and accessories; optical instruments and lenses; surveying and drafting instruments; surgical, medical, and dental instruments, equipment, and supplies; ophthalmic goods; photographic equipment and supplies; and watches and clocks.

39 MISCELLANEOUS MANUFACTURING INDUSTRIES This major

group includes establishments primarily engaged in manufacturing products not classified in any other manufacturing major group. Industries in this group fall into the following categories; jewelry, silverware and plated ware; musical instruments; toys, sporting and athletic goods; pens, pencils, and other office and artists' materials; buttons, costume novelties, miscellaneous notions; brooms and brushes; caskets; and other miscellaneous manufacturing industries.

APPENDIX C

Geographic Definitions of Economic Areas

This publication has contained a tabulation entitled "Economic Areas" since 1954. This series now consists of thirty areas which were delineated on the basis of population and manufacturing employment cross-sectional evaluation. Care should be exercised in making comparison of these thirty areas with the earlier areas as there have been changes made in almost all the regions as well as three new areas added.

The civil division with the largest population is in capital letters, and the civil division with the most workers employed in manufacturing is underlined. The minor civil divisions contained in the areas are as follows:

Area No.	1982 Population	Town	Area No.	1982 Population	Town
1	18 861	Cyr, Eagle Lake, Fort Kent, Frenchville, Grand Isle, Hamlin, <u>MADA-WASKA</u> , New Canada, St. Agatha, St. John, Van Buren, Wallagrass, T17 R3, T17 R4, T17 R5	9	17 531	BAR HARBOR, Cranberry Isles, Franklin, <u>Gouldsboro</u> , Hancock, Lamoine, Mount Desert, Sorrento, Southwest Harbor, Sullivan, Tremont, Trenton, Winter Harbor, 7 Southern Division, 8 Southern Division
2	49 644	Ashland, Blaine, Caribou, Castle Hill, Caswell, Chapman, Connor, E. Plt., Easton, Ft. Fairfield, Limestone, Mapleton, Mars Hill, Masardis, New Sweden, Perham, <u>PRESQUE ISLE</u> , Stockholm, Wade, Washburn, Westfield, Westmanland, Woodland, T11 R4	10	8 495	BLUE HILL, Brooklin, Brooksville, Castine, Deer Isle, Long Island, Sedgwick, <u>Stonington</u> , Swans Is., Island Au Haut

NOTE: Since the 1982 population census data is unavailable for some unorganized townships, the area population in some instances may be slightly understated. Population data is from: Population Estimates for Minor Civil Divisions by County, Maine, 1982; Maine Department of Human Services, Bureau of Health Planning and Development, December, 1983.

APPENDIX F

Raw and Adjusted Data Comparisons, 1981-1982

The data on the following table has been adjusted using two major price indexes published by the U.S. Department of Labor, Bureau of Labor Statistics. The Value of Product data is adjusted by the Producer Price Index (formerly the Wholesale Price Index). Wage data is adjusted by the Consumer Price Index for Urban Wage Earners and Clerical Workers. In both cases, the base year is 1967. Adjustments made are based on annual average index.

The Consumer Price Index is a monthly statistical measure of the average change in prices in a fixed market basket of goods and services.

The CPI is based on prices of food, clothing, shelter, fuel, drugs, transportation fares, doctor's and dentist's fees, and other goods and services that people buy for day-to-day living. The quantity and quality of these items is kept essentially unchanged between major revisions so that only price changes will be measured. Prices are collected from over 18,000 tenants, 24,000 retail establishments, and 18,000 housing units for property taxes in 85 urban areas across the country. All taxes directly associated with the purchase and use of items are included in the index.

Though the CPI is often called the "Cost-of-Living Index", it measures only price change, which is just one of several important factors affecting living costs.

Producer Price Indexes measure average changes in prices received in primary markets of the United States by producers of commodities in all stages of processing. The sample used for calculating these indexes contains about 2,800 commodities produced in the manufacturing, agriculture, forestry, fishing, mining, gas and electricity, and public utilities sectors. The universe includes all commodities produced or imported for sale in commercial transactions in primary markets in the United States.

To the extent possible, prices used in calculating Producer Price Indexes apply to the first significant commercial transaction in the United States, from the production or central marketing point. Price data are generally collected monthly, primarily by mail questionnaire. Most prices are obtained directly from producing companies on a voluntary and confidential basis. Prices generally are reported for the Tuesday of the week containing the 13th day of the month.

(For Transportation Equipment, the base is not 1967 but 12/1968.)

1981 Annual Average = 272.3
1982 Annual Average = 288.6

	<u>1981</u>	<u>1982</u>
Total Manufactures	285.9	292.7
Pulp, Paper, & Allied Products	273.7	288.6
Hides, Skins, Leather, & Related Products	261.5	263.0
Processed Foods & Feed	248.7	251.5
Lumber & Wood Products	292.8	284.7
Transportation Equipment	235.4	249.7
